Welcome

We cover both brand name drugs and generic drugs. Generic drugs have the same active-ingredient formula as a brand name drug. Generic drugs usually cost less than brand name drugs and are rated by the Food and Drug Administration (FDA) to be as safe and effective as brand name drugs. Members may be required to pay more for a prescription when a brand name product is dispensed.

What is a Drug List?

A formulary drug list is a list of drugs covered under your pharmacy benefit and developed to serve as a guide for physicians, pharmacists, healthcare professionals and members in the selection of cost-effective drug therapy. The formulary does not define benefit coverage and limitations. Many members have specific benefit inclusions, exclusions, copayments or a level of coverage, which are not reflected in the formulary. Members should contact their Plan Sponsor or Wellmark Customer Service at the number on the back of their ID card if they have questions regarding their coverage.

Price varies by person and location.

Find out if your medication is covered and what it will cost based on your benefit plan. We'll show you lower-cost options, if available.

Please keep in mind that the price shown may not accurately reflect what you will pay at the pharmacy. Your actual price may vary depending on your benefit plan design, deductibles, previous payments, pharmacy-specific pricing, future claims and prior authorizations.
